

## Country Reports produced by projects

- MODI-FY
- PRO-Heritage
- INCREAS

### MODI-FY:

Erasmus+ project, Vocational Education, Project number 2014-1-AT-01-KA200-001034

As MODI-FY aimed to develop relevant VET for assistant & project managers working in organisations responsible for historic buildings, partners at first researched available education for maintenance managers of historic assets. These country reports were issued for each partner country in the national language, plus a short version in English. Reports are available for Austria, Belgium, Hungary, Italy, Portugal, Slovakia, United Kingdom: [Downloads \(european-heritage-academy.eu\)](https://european-heritage-academy.eu)

### PRO-Heritage

Horizon 2020 project, 2019-2022, Project number 785211

One of the first task for partners in PRO-Heritage was to establish country reports on the topic of relevant education for traditional crafts in regards to energy efficiency. Partners researched where professionals are trained, what the training includes and if there are any gaps, where PRO-Heritage needs to step in. Country reports were issued for each partner country in the national language and a short version in English. Reports are available for Austria, United Kingdom, Slovakia, Portugal, Spain: [DX.X Deliverable template \(pro-heritage.eu\)](https://pro-heritage.eu)

### INCREAS

DG European Commission Pilot project, 2020-2022, Project number EAC-2020-0304

The task of completing country reports for all partner countries in INCREAS was a bit more challenging as here partners needed to research several streams of education. The main question to be answered was, what kind of education is available for Cultural Heritage and CCI. Beside that, partners searched for specific training in regards to digitisation across all EQF levels, including universities.

A second aim was to define all professions belonging to the newly established sector for Cultural Heritage and CCI and to link those with the relevant education available. Reports are available for Austria, Hungary, Italy, Slovakia, Spain, Poland222: [Download Deliverables – INCREAS](#)

In all projects the country reports became the base for the development of new training offers, covering the identified gaps of education in partner countries of the project concerned.
