3. NEB in Spain

3.1 NEB projects funded by the EU

Lighthouse Demonstrators

The first six lighthouses will implement the New European Bauhaus principles of sustainability, aesthetics and inclusiveness on the ground in 13 countries. They will transform neighbourhoods in cities, look into rural development and link projects from different countries. Press release: https://ec.europa.eu/commission/presscorner/detail/en/IP_22_2780

Name of the project	Description
EHHUR (EYES HEARTS HANDS Urban Revolution)	The project supports cities and vulnerable residents in transforming their built environment. Spread across seven different locations in the EU and Associated Countries (DK, EL, BE, PT, TR, HR, IT), it will seek to tackle socio-economic and cultural challenges such as social segregation, energy poverty, and degradation of depopulated historical centres.
DESIRE (Designing the Irresistible Circular Society)	The project wants to tackle the major challenges faced by societies and cities: climate change, biodiversity loss and resource challenges. Based on three main themes of inclusivity, circularity and reconciling cities with nature, the project will use art, architecture, and design to explore alternative ways of transforming territories across different European cities (DK, NL, SI, IT, LV).
Bauhaus of the Seas Sails	With this project, cities close to water will be offered solutions to achieve climate neutrality. It will result in seven transformational demonstrators in different regions and aquatic ecosystems: in Portugal (estuary), Italy (lagoon and gulf), Sweden/Germany (strait / sea / river), and the Netherlands / Belgium (delta). The project aims at achieving a sustainable and inclusive transition, keeping the aesthetic at the centre and working closely together with the local communities.

New European Bauhaus Calls

Projects supported by dedicated NEB Calls

Name of the project	Description	Type of NEB Call	Link
ASD-Publics	ASD-publics will aim to explore nature-based solutions to improve playing areas for children with autism and their families. The project will pilot co-creation with the Autism Spectrum Disorder (ASD) community to understand how spaces can be changed to create a more inclusive and multi-sensorial experience.	New European Bauhaus Co-creation of Public Spaces (EIT), 2022	/
EITra: Elderly on Track	The EITra project aims to enhance mobility within seniors' networks, improving their physical and mental health, as well as fostering social inclusion. This will be done by evaluating their interactions with their physical environment and helping create healthy habits and social networks.	New European Bauhaus Citizen Engagement Programme (EIT) 2022	/
Spain - Ajuntament de Sant Boi de Llobregat L'Olivera DigitAll: a digital and sustainable education facility for all	The transformation of an existing building into an innovative education public facility. It will have new room arrangements and services that facilitate the digital transition, leaving no one behind. It is intended to become a green, neutral-emissions building with a spirit of full circularity.	Call " Support to New European Bauhaus Local Initiatives " (technical assistance to small and medium-sized municipalities)	/
Spain - Municipality of Nijar GAIACELLS: bioconstruction for integration temporary housing	The eradication of shanty towns in agricultural areas through the bioconstruction of temporary accommodation using the Superadobe technique. GAIACELLS is proposed as a dignified, effective, aesthetic, participatory and sustainable solution to the serious problem of social inclusion.	Call " Support to New European Bauhaus Local Initiatives " (technical assistance to small and medium-sized municipalities)	
Open Nature	Open Nature will work with the Collserola Natural Park, central to the Metropolitan Area of Barcelona, to identify sites in need of ecologic and aesthetic remediation and then install elements inviting public engagement while promoting sustainability. The installations will be co-designed by students from surrounding urban schools, with limited access to nature, offering	New European Bauhaus Citizen Engagement Programme (EIT)	/

	an inclusive experience to learn from the world around them.		
Re-monda	Re-monda, a circular solution to manufacture highly-demanded biodegradable materials in a context of plastic crisis worldwide. Re-monda seeks to turn oranges into bioplastic, re-valuing organic waste while reducing the environmental impact of the whole city. This is possible thanks to the presence of valuable polysaccharides such as pectin, cellulose and hemicellulose in the orange peel. The proposal was born in Climathon Sevilla 2021, with the goal of implementing it in eCitySevilla, a carbon-neutral project in Cartuja island for 2025.	Audience Award of €1,000 plus travel and accommodation to attend the New European Bauhaus Ideation Awards Ceremony	/
NEST (NEB prize 2021)	The winning project NEST was also selected among the 20 innovative European start-ups selected for financial support by the European Institute of Innovation and Technology's (EIT) as part of its New European Bauhaus Community Booster initiative	New European Bauhaus Community Booster initiative	https://www.youtube.com/watch?v=EYXqIVyDpE0&list=PL_VrUpKWOUlwF3umk9LGEVbp3e09DKUBg
Craft Cities: Valenica, Cordoba, Lleida and Zaragoza	Valenica, Cordoba, Lleida and Zaragoza are part of the Craft Cities cohort	Craft Creating Actionable Futures	craft-Factsheet.pdf (craft-cities.eu)
DrOp (Digitally enabled social district renovation processes for age-friendly environments driving social innovation and local economic development)	DrOp is coordinated by the City Council of Ermua. The core ambition of the project is the development of an integrated renovation methodology aiming to transform social housing districts into inclusive smart neighbourhoods. (...) This process will be enriched by a peer learning method: Ermua will iterate with Elva (Estonia) as digitally advanced, and Matera (Italy), with their experience around the CCIs having been European Culture Capital 2019.	Social and affordable housing district demonstrator	DrOp

3.2 NEB projects funded by the RRF

Call: Public Building Renovation Program / Programa de Impulso a la rehabilitación de edificios públicos (PIREP)

Topic description: The PIREP program, which stands for "Plan de Impulso para la Rehabilitación de Edificios Públicos" (Plan to Boost the Renovation of Public Buildings), is financed with Next Generation funds and is primarily focused on the renovation of public buildings owned by local and regional authorities. The program is divided into two subprograms: one aimed at local authorities and the other at regional authorities. The renovations are always cofinanced with fund of the administration that owns the building.

Objectives: This investment program is focused on the comprehensive renovation of public buildings. The renovations are required to significantly improve the energy efficiency of the buildings, while also addressing other aspects such as inclusiveness, indoor air quality, aesthetics, and functionality. An open call was launched in March 2022 to allow local authorities to submit their proposals for building renovations. Additionally, proposals that have undergone a participatory process and align with the values of the New European Bauhaus (NEB) were positively evaluated during the assessment of the open call.

Budget: 600 million (Open call for local authorities)

3.3 NEB projects developed and implemented by NEB Community without EU or national financing

Financing: National financing

Project: La **Casa de la Arquitectura**

Description: This institution that was opened in late 2023 is conceived as a museum that seeks to promote and foster the principle of architectural quality, recognizing its impact on the built environments of towns and cities. Precisely, the principle of architectural quality, outlined in the recently passed Law on high Quality Architecture, is based on the fulfillment of a series of criteria that are perfectly aligned with the three values pursued by the European initiative of the New Bauhaus: inclusion, sustainability, and beauty. Therefore, ultimately, the institution promotes the achievement of the three values of the New European Bauhaus. At the same time, the activities hosted at La Casa de la Arquitectura are aimed at an intergenerational audience and have an inclusive nature. La Casa de la Arquitectura aims to become a reference in the dissemination of architecture in Spain through a dual presence: a main physical headquarters, which may be joined by other permanent or temporary branches anywhere in the national territory, and a virtual strategy

Link for more information: [Home - La Casa de la Arquitectura / BOE-A-2023-25761 Real Decreto 1125/2023, de 19 de diciembre, por el que se crea y regula la Casa de la Arquitectura.](#)

3.4 Other NEB actions and initiatives on national, regional or local levels

Title	Description	Link	Date
Spanish Act on High Quality Architecture	<p>In Spain, the NEB helped for the swift adoption of a new Act on High Quality Architecture incorporating sustainability, quality, inclusion and accessibility values. The legislative process was prepared with a participatory process which ran in parallel with the co-design phase of the NEB and the Spanish Ministry of Transport, Mobility and Urban Agenda exploited the synergies with the new EU initiative.</p> <p>Quote by Spanish NPC from Arch Daily article: <i>Iñaki Carnicero, Director General of the Urban Agenda and Architecture, previously pointed out that this law has also "found its most propitious context at the present time, as it is aligned with several recently promoted European and international initiatives, such as the New European Bauhaus, the Urban Agendas, the Davos Declaration and the Renovation Wave".</i></p>	<p>Spain Approves New Law on Architectural Quality ArchDaily</p> <p>PECA! Propuestas sobre el Entorno Construido y la Arquitectura (mitma.es)</p>	08/06/2022
New European Bauhaus Platform of Spain	The website shows an overview on New European Bauhaus developments in Spain, including NEB Community meetings, Spanish network meetings, Prize winners and initiatives.	https://neweuropenbauhaus.es/	08/06/2022
NEB Lab Proposal by Spanish NEB partner Concomitantes (ES)	<p>Engaging in Sustainability</p> <p>"The mission of this project is to demonstrate the capacity of culture and art to address sustainability and not only as a generator of new works of art but also as an activator of processes, of participatory methodologies that make it easier for neighbours to experience responses to their collective needs. This proposal seeks to create a community of learning with which to share experiences and knowledge about different artistic or cultural practices focused on sustainability, in which citizen participation is key.</p>		
EAAE Towards a New European Bauhaus. Annual Conference + General Assembly 2022.	Between 31 August and 2 September, the annual conference of EAAE (European Association of Architectonic Education) took place in the ETSAM (Escuela Técnica de Arquitectura de Madrid) and it was focused on analyzing the role that architecture and design schools must play in teaching how to translate the values of NEB into liveable spaces, in the end, how to bring the New Bauhaus into a reality. This event included conferences, workshops and round tables.	https://eaaemadrid2022.es/eaee/	31 August- 2 September 2022
Conference about New European Bauhaus at Centro de Creación Contemporánea Matadero Madrid.	The purpose of the event was to promote the NEB initiative and, at the same time, to highlight the Spanish role in the definition and implementation of this project. The objective was also to create a forum for exchanging experiences between the different actors that are developing projects aligned with the New European Bauhaus.	<p>https://www.youtube.com/watch?v=WiGylfi1tPY</p> <p>https://peca.mitma.es/debates/jornada-sobre-la-nueva-bauhaus-europea</p>	2 July 2021
I Foro Urbano de España y III Foro de Gobiernos Locales.	The first edition of Foro Urbano España took place in Seville in October 2021 and one of its sessions was dedicated to the NEB. This event is to be held every year and it is conceived as an important tool to promote the implementation of the Spanish Urban Agenda.	Programa - I Foro Urbano de España (forourbanoespana.es)	7 October 2021

Joint Research Centre in Seville	First Commission building fully inspired by the New European Bauhaus values will be built in Sevilla. The new site of the Joint Research Centre in Seville will deliver on the JRC's commitment to sustainability, unite the European vision of the New Bauhaus initiative, and establish a new benchmark for workspace that empowers collaboration and co-creation.	https://europa.eu/new-european-bauhaus/new-european-bauhaus-inspired-future-jrc-site-seville_en	
<u>LIFE WINS</u> exhibition	The LIFE WINS exhibition in Valencia with Cachetejack , a popular duo of illustrators, was organised together with the New European Bauhaus partner World Design Capital Valencia 2022 in the Botanical garden of the University of Valencia. It was meant to promote the NEB values locally.		
Forum of the New European Bauhaus	The Ras de Terra Centre , located in the region of La Vera, Cáceres, partner of the New European Bauhaus, organised a forum of the New European Bauhaus , held on 24 November 2021, which presented initiatives that are already linked to the New European Bauhaus and involved various local agents from both Extremadura and Portugal with the aim of serving as inspiration for projects involved in some of the fields of action that promote the values of the NEB, such as rurality, sustainability and inclusion. This was the first conference of these characteristics organised in Extremadura in collaboration with the Junta de Extremadura through its Gabinete de Iniciativas Transfronterizas and has been co-financed by the Cross-border Cooperation Programme Spain - Portugal INTERREG V A.		
NEB Partner	The Galician Health Service (SERGAS) led a region-wide project that envisions the health sector as a driving force for cultural and social transformation based on sustainability.		
International Biennale of Landscape Architecture	From the 27 September to 2 October 2021 a new edition of the International Biennial of Landscape Architecture of Barcelona took place, which will host the symposium "Climate change, again: City and Nature" to reflect on the importance of landscape in reducing climate change.	International Biennial of Landscape Architecture, Barcelona	
Public Building Renovation Program / Programa de Impulso a la rehabilitación de edificios públicos (PIREP)	This investment program endowed with Next Generation Funds is focused on the renovation of public buildings with a comprehensive approach. All the renovations must accomplish important improvements in the energy efficiency of the building and, at the same time, the programs seeks that another upgrades would be done in other aspects of the building, such as, in its inclusiveness, in its indoor air quality, in its aesthetics, in the functionality of the building, etc. An open call was launched in March allowing local authorities to present their building renovation proposals. Moreover, if a participatory process has been held and if the renovation is	Convocatoria de ayudas del Programa de Impulso a la Rehabilitación de Edificios Públicos de entidades locales (Pirep Local) Ministerio de Transportes,	11 March 2022 – 31 March 2026

	aligned with the values of the NBE, it is also positively valued in the open call assessment.	Movilidad y Agenda Urbana (mitma.gob.es) Disposición 3851 del BOE núm. 60 de 2022 guia para la solicitud de ayudas del plan pirep edicion 2.pdf (mitma.gob.es)

3.5 NEB Prizes

To accelerate the green transition, contribute to the recovery and to ensure a better living together for all, we have to capitalise on the existing wealth of knowledge, experience and capacities as much as to call for new visions, new ideas and new solutions. The Prizes bring together those excellent examples and new ideas that could inspire the New European Bauhaus. The NEB Champions rewards existing completed examples and the NEB Rising Stars rewards concepts or ideas submitted by young talents aged 30 or less.

The New European Bauhaus prizes 2021 awarded 10 NEB Awards and 10 NEB Rising Stars. You can find the complete list of finalists here: <https://2021.prizes.new-european-bauhaus.eu/>

Strand	Project Title	Description
NEB Rising Stars	NEST	NEST is an ecological façade system which would be made through sustainable ceramic/clay 3d printing techniques. Façade panels are tailored to create specific environment that will allow the passive or low maintenance growth of the plants or places to nest for desirable species of insects, birds and bats, while maintaining the high performance of the building and healthier micro-climate. We offer a solution that either upgrades existing buildings or is incorporated into new build.
NEB Rising Stars	Spaces to reconnect citizens with cities	Project for the definition of standards and implementation of a Toolkit to create and replicate systemic events with reduced environmental impact. A pilot event will be realised in Barcelona in collaboration with the Posidonia Green Festival, focusing on promoting local culture and

		products through an immersive and educational experience around responsible consumption and good practices of daily living.
NEB Award	Degree in Design. Universidad de Navarra	The new "Degree in Design. Universidad de Navarra" is an experience that fits perfectly within the framework pursued by the "New European Bauhaus wave", it is a teaching methodology that integrates the theoretical, practical, technical, and creative contents, which acquire their whole meaning applied to a project. The students, through the practical and creative exercise of the project, can connect and understand the whole constellation of subjects, ideas and teachings offered to them.
NEB Award	Gardens in the Air	A circular initiative of urban renaturalisation involving artists, scientists, architects, designers, residents of Tres Barrios-Amate and youngs from the local association A.E.S. Candelaria. An exploration of the resources and species of the neighbourhood, to imagine new relationships of sustainable prosperity through an integral process that takes the form of a vertical garden, a perfume that distills plants from the neighbourhood and a sound composition that celebrates new alliances.
NEB Award	ULIA GARDEN	Our community garden project, Ulia Garden, is focused on transforming a former plant nursery into a community garden managed by local citizens. This project is driven by urban regeneration and agroecological community action. It is nurtured by the voluntary work of many people who, by getting their hands in the soil, seek to weave new relationships between committed citizens, integrate the care of nature as a central concept, and share the beautiful essence of life and a common project.
NEB Award	APROP Ciutat Vella	APROP is an affordable, sustainable, fast and high-quality housing programme providing evicted households with emergency accommodation in their own neighbourhood. A lightweight, dry, modular and reversible construction system using reused shipping containers has been specially conceived to achieve high rates of energy efficiency and excellent architectural standards. The first APROP is already in operation in Ciutat Vella, Barcelona while two other buildings are currently under construction.
NEB Award	LA FÁBRICA DE TODA LA VIDA	After being abandoned for years, an old cement factory is now a collaborative space for free culture. Located in a rural municipality of Spain, La Fábrika has become a landmark for an open network of creators, thinkers and social agents throughout the territory. Over the course of our ten years of activity, more than 3.000 people have contributed to regenerate the space. Together we build, meet and explore.

3.6 NEB Lab

The NEB Lab is a co-creation space at the service of the New European Bauhaus community, for the delivery of beautiful, sustainable, and inclusive projects to improve our daily lives. The Lab is where the New European Bauhaus is implemented in concrete and tangible projects. It is about what we can achieve when we work together in a spirit of openness and trust. It focuses on connecting people, learning from each other and tapping into everyone's experience.

Website: https://new-european-bauhaus.europa.eu/about/neb-lab_en

NEB Lab projects with participating entities from Spain:

Name of the project	Participating ES entities	Description	Link
NEB Goes South	Valencia School of Architecture	This community-led NEB Lab project connects six south European countries, which join forces to reflect about and improve education through architecture. Southern European regions deal with a multitude of similar climate and social problems; furthermore, they also share rich	Project fiche

		histories and a cultural heritage in need of protection. Acknowledging this common geographical and cultural legacy, the NEB goes South initiative emerged as a direct response to the New European Bauhaus challenge.

4. NEB Festival 2024

Additional information about the activities and speakers is available on the [NEB Festival website](#).

4.1 Satellite events

Title	Location	Organisation	Description	Date (start and end)
CONECTA Migrants & Refugees	Madrid	Consortium: Support The Languages of Energy (Official Partner NEB, since 2021) RED CONECTA: Bridge for Billions + Catalyst 2030 + United Way + Karibu Association + Triple + Puentes Global Foundation	<p>Our event is about presenting the project "Connect Migrants and Refugees" whose purpose is to creating inclusive ecosystems for entrepreneurs immigrants and refugees. An opportunity to create a network of support and accompaniment to improve people's lives and increase well-being in communities and their territories, creating social, economic and human value.</p> <p>This event offers the opportunity to connect with multi-level stakeholders that supports the development of a European Network that integrates capabilities, unites collective intelligence and puts NEB values into practice.</p> <p>Conecta Migrants & Refugees is a unique community of leaders from ESOs (Entrepreneur Support Organizations) who work together to support migrant entrepreneurs on a path to make the entrepreneurial ecosystem more inclusive, resilient, and cohesive.</p> <p>Through support between organizations, we achieve greater impact by sharing experiences and knowledge, collaborating in fundraising efforts, and developing the capacity to enhance our incubation programs to adapt to all the realities we work with.</p> <p>Conecta Migrants & Refugees opens a door to opportunity: to stop working separately and explore the power of working together towards a common goal - enabling migrants with business ideas to turn them into viable ventures that create jobs.</p> <p>Conecta was born with the idea that working hand in hand is always better than going our separate ways. We have observed for years how entrepreneurial ecosystems in countries struggle to grow because they are fragmented, and each</p>	18/04/2024 19/04/2024

			<p>organization supporting entrepreneurs works individually. They prioritize what we call "ego-systems" over ecosystems. And that's something we want to change. Migrants and Refugees have the ideas and talent, but we know they usually don't have the same opportunities as others. That's why we believe entrepreneurship is a vehicle for growth and progress, enabling migrants not only to create self-employment but also to generate employment.</p> <p>It's about changing lives. Entrepreneurship serves as a tool for all migrants and refugees who have an idea and aspire to transform it into a business that enables personal and professional growth, generates income, and significantly enhances their integration into local communities.</p>	
CO-BAUHAUSING	Murcia	EuroVértice Consultores S. L.	<p>The event CO-BAUHAUSING, is part of the activities of LIFE BAUHAUSING Europe, a project that has received funding from the LIFE program in the 2022 call, and which aims to transform 5 European neighbourhoods following the principles of the NBE. Within the framework of this project, the transformation of the neighborhoods is carried out making the citizens of these neighborhoods protagonists, through a process of co-designing public buildings and environments.</p> <p>For this, a social innovation process has been designed to improve the co-governance that includes in its initial phase, co-creation workshops in the five neighborhoods of the project and that will be shown in 5 Satellite Events, in the Festival of the New European Bauhaus.</p> <p>These co-creation workshops aim to identify the needs, and possible uses and improvements of the buildings to be rehabilitated. The results of these workshops in the five neighborhoods involved will be presented through a collective artistic action in each neighborhood in which the shared vision of all the participants will be shown offering a visual record of the whole process. Exhibition devices designed specifically for the festival shall be used for this visual record.</p> <p>The main objectives of the proposal are to:</p> <ul style="list-style-type: none"> - Reinforce the sense of community and belonging in the neighborhoods of the project. 	18/04/2024 20/04/2024

			<ul style="list-style-type: none"> - To bring the New Bauhaus closer to the citizenship. - To involve all the citizenship through an innovative participatory process. - Establish an innovative co-creation process that can be visible and activate more citizens and other municipalities. <p>A co-creation workshop and collective artistic action will be held in the five locations that are: Cartagena (Spain), Blanca (Spain), Adaži (Latvia) Erzsébetváros (Budda District, Hungary) and Varaždin (Croatia). The locations allow to implement co-creation methodologies in very diverse neighborhoods and localities, with different population dimensions or of different character, both rural and urban.</p>	
MEDCity: Festival de Resiliencia para ciudades mediterráneas	Alicante	Casa Mediterráneo	<p>MEDCity is not just a congress, it is a vibrant festival that brings together bright and passionate minds to explore innovative solutions in creating more resilient and sustainable mediterranean cities by finding new building and design solutions adapted to our unique climate. Throughout the event, participants will have the opportunity to immerse themselves in a comprehensive experience that encompasses roundtables, keynotes and parallel activities across the city.</p> <p>Roundtables: Leading experts in their fields will gather in roundtables to discuss and debate the latest trends, challenges and opportunities in climate resilience and sustainable design for Mediterranean cities. These sessions will provide a platform for the exchange of ideas and collaboration between professionals, institutions and companies.</p> <p>Keynote Speeches: Leading speakers, experts in sustainability, innovation and urbanism, will share their knowledge and experiences through keynote presentations. These presentations will offer deep and visionary insights into the crucial role that various disciplines play in building future-proof cities.</p> <p>Parallel Activities in the City: Beyond the walls of the main event, MEDCity extends to the city itself. Parallel activities at different strategic points in the city will engage the local community and raise awareness among different groups. From educational workshops to artistic</p>	18/04/2024 20/04/2024

			interventions, these activities will provide opportunities for citizens of all ages to connect with the importance of climate resilience in their environment.	
Collaborative purchasing: Journey towards fairer consumption.	Bilbao	COLLABRICS	<p>At COLLABRICS we are on a mission to reduce textile waste from the very first moment of purchase. Why? Because we noticed that textile suppliers demand very high minimum orders. Therefore, medium and small brands decide to buy extra meters of fabric so that the meter is cheaper or even to have access to a certain provider, producing textile waste.</p> <p>That's why we have created a collaborative platform, so that brands can be able to buy fabrics together, reducing both their environmental impact and their expenses.</p> <p>But our project is not just a platform, it's a community of designers who share our passion for sustainable and accessible fashion.</p> <p>With this event we want to convey the values of sustainability and democratization of our brand. We would like to show to the participants that there are alternative ways of production which can be implemented in their companies through the concept of collaborative consumption.</p> <p>The event will be divided into two sections: presentation and introduction to collaborative economy and recreational activity. In the presentation we will focus on transmitting that the future of fashion is in the collaboration between companies. We know that many companies already collaborate together in the creation of designs and collections but also we want to propose new forms of collaboration between brands to optimize their resources. We will explain it with the example of textile orders in a collaborative format that we use in COLLABRICS.</p> <p>Once every concept is cleared up we will invite them to reflect on their weaknesses as a company before proceeding to the group activity.</p> <p>This activity will be carried out through ZOOM group rooms that will be created taking into account the different profiles and professional activities. By pooling their</p>	17/04/2024 17/04/2024

			<p>weaknesses they will have to find collaborative strategies to overcome them together.</p> <p>During this time the brands will have the opportunity to get to know each other and create links between them in order to materialize those collaborations and create a positive impact and possible future synergies.</p> <p>At the end of the event, all participants will come back together in the same previous room to share the collaborative solutions they have come up with.</p> <p>After the event every participant will receive an email with a summary of the event where they will also find the contacts of the other participants and the collaborative solutions commonly found so that they can apply them to their companies.</p>	
NEB Cross-border Forum on Rural Housing and Repopulation	Valverde de Burguillos (Badajoz, Spain) and Beirã (Marvão, Portugal)	Compañía Maximalista S.Coop (Spain) and Associação Planeta Alecrim (Portugal)	<p>The lack of available housing is the main problem facing the attempts to revitalize villages and counties in demographic crisis. We want to share successful experiences in order to start working on their replication both in the EUROACE cross-border area and in other depopulated regions of the EU.</p> <p>The event will be jointly hosted in two towns in the EUROACE region:</p> <ul style="list-style-type: none"> - Beirã (Marvão, Portugal) and - Valverde de Burguillos (Badajoz, Spain). <p>The NEB promoting partners are:</p> <ul style="list-style-type: none"> - Compañía Maximalista S.Coop (Spain) - Associação Planeta Alecrim <p>The objectives include:</p> <ul style="list-style-type: none"> - To share NEB experiences that address the scarcity of housing in villages and regions in demographic crisis 	18/04/2024 19/04/2024

The CSCAE Observatory2030. A Networked catalyst for grounding NEB values	madrid	CSCAE (consejo Superior Colegios Arquitectos de España	<p>3 panels of multidisciplinary experts are proposed to highlight the values of the NEB by linking the topics together with a moderator to act as a common thread:</p> <ol style="list-style-type: none"> 1) on the quality of the experience, including style/aesthetics and the health and safety of living environments. 2) on the importance of incorporating the parameters of sustainability, including circularity 3) on inclusiveness, including accessibility and affordability. <p>The panels want to emphasize the benefit of the NEB for society, through its direct application in the built environment, emphasizing the context of the Baukultur and the law of quality of architecture in Spain that emphasizes the social function of the discipline. involving in the panel architects, politicians, doctors, artists, journalists and entrepreneurs who are part of the nearly 500 experts who have participated in the working tables of the ecosystem generated by the Observatorio2030.</p> <p>(www.observatorio2030.com)</p>	24/04/2024 24/04/2024

360 Democracy	Barcelona	Democratic Society	<p>In the bustling heart of Barcelona, a city rich in history, diversity, and innovation, our initiative is set to rise as a vanguard for inclusive dialogues and community-building. We, Democratic Society, in collaboration with the Municipality of Barcelona, and a cadre of inspired European artists, are designing an innovative public square installation. This project, seamlessly aligned with Barcelona's esteemed title as the European Capital of Culture, promises high visibility and profound societal impact.</p> <p>Our aspiration is to ignite the essence of 'Third Places' - those communal spaces distinct from work or home, where individuals congregate, interact, and thrive. These Third Places, historically, have been crucibles for social interaction, innovation, and community solidarity. By revitalizing and transforming a select public space into a contemporary Third Place, we aim to blend the boundaries between art and dialogue, nurturing environments where discussions on just transition can flourish.</p> <p>Our chosen space, selected meticulously from three distinct scenarios – the bustling Rambla, the diverse Raval, or the pioneering Super-illa, will resonate as a metaphor for Barcelona's urban heart. Within this space, an artistic installation will serve not merely as an exhibit but as a mediator, facilitating a performance that transcends traditional dialogues, focusing on the symbiotic relationship people share with their territories. This will spotlight the narratives of the marginalized, emphasizing their essential role in the fabric of our shared European legacy.</p> <p>By elevating the discourse from mere dialogue to a richer, more nuanced conversation, we are harnessing the potential of Third Places. These zones, rich in diversity and vibrancy, become arenas for communal exchange, where the challenges and triumphs of transitioning societies are laid bare, analyzed, and celebrated.</p> <p>Furthermore, our venture is not just about creating a space; it's about nurturing an ethos. It's about realizing the democratic ideals that Europe stands for, making sure that voices, especially from the peripheries, aren't just heard but are instrumental in shaping dialogues and decisions. In an age where societal disparities are stark, our project aspires to be a beacon, guiding societies toward inclusivity, cohesion, and mutual respect.</p>	20/04/2024 20/04/2024
---------------	-----------	--------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------

			<p>Objective and Dynamics:</p> <p>This endeavor strives to forge links between the marginalized and the mainstream, employing art as a mediator to facilitate dialogue on the crucial themes of just transition. Our goal is to work intimately with those on the fringes, addressing the disparities and bringing forth conversations that resonate with the everyday realities of the diverse populace. We believe in the transformative power of such dialogues in unraveling new dimensions of societal discourse and in fostering inclusivity and mutual growth.</p>	
Encuentros NEB Sur +. Retorno a lo Básico: agua, sombra, cobijo (NEB Meetings South+. Back to Basics: water, shade, shelter)	Córdoba	Fundación Arquitectura Contemporánea	<p>Fundación Arquitectura Contemporánea (Contemporary Architecture Foundation), as a spanish NEB partner, proposes NEB Meeting Point Sur+, a space for encounter between european policies and local initiatives, aiming for the enhancement of the particularities that make mediterranean cities valuable facing the different challenges and opportunities that NEB network presents.</p> <p>Among the activities that Fundación Arquitectura Contemporánea has developed, we can find:</p> <p>a/ Festival NEB 2022 "Redescubriendo el Mediterráneo" (NEB Festival 2022 "Rediscovering Mediterranean"), which succesfully echoed the Festival that took place in Brussels, but in a local scale. It consisted mainly in a series of parallel events that were identified through an Open Call for projects. The aim was to make visible local positive practices aligned with NEB principles.</p> <p>b/ Encuentros NEB Sur+ (NEB Meetings Sur+), an event that will take place in the context of "Urban October" and the celebration of the Cities World Day, promoted by ONU-Hábitat on the 31st of October 2023. This encounter will bring together different colloquia, talks and debates carefully selected through an Open Call, with the objective of identifying key agents and collectives that actively work for the enhacement and implementation of NEB principles in mediterranean cities.</p> <p>This edition's proposal, "Encuentros NEB Sur+ Back to Basics: water, shade, shelter" is conceived as a participatory event in which a wide range of local agents and</p>	18/04/2024 20/04/2024

			<p>communities will have the opportunity to reflect around the role of mediterranean territories in the construction of more sustainable, beautiful and inclusive european cities.</p> <p>The central topic here will be nature, traditional knowledge and practices, and the importance of reconnecting with the very basics of life, giving special attention to the core of mediterranean civilisation since its beginnings: water, shade and shelter.</p> <p>It will bring together conferences and talks, as well as artistic displays, live music, dance shows and workshops. It is designed to function as well as the perfect showcase for emergent local initiatives and projects that take into account (and turn into real practice) the New European Bauhaus principles.</p>	
Re-connecting	Madrid	Fundación ARTS	<p>Re-connecting is a multidimensional event that intertwines design, artistic expression, and nature values. The focal point of this event is the creation of an artistic installation that will take place in the main entrance of the University Center for the Arts TAI (member of Arts Group). This installation, strategically positioned in a window display entrance, offers accessibility from both inside and outside the building. As a result, its impact extends not only to TAI's immediate community but also to passersby in the surrounding neighborhood.</p> <p>The main objectives are:</p> <p>The creation of an installation that establishes a connection with nature both through its aesthetics and the process of its creation. All materials employed in the installation will be sourced from recycled and reused elements, with a deliberate focus on incorporating components from the surrounding neighborhood (e.g. cardboard from retail stores on Serrano St., seeds from the Retiro Garden).</p> <p>To prompt neighbors and community members to reconsider their existing relationship with nature and explore avenues for reconnecting with it. Consequently, the installation will feature interactive QR codes designed to offer viewers practical tips and guidelines for activities they can undertake in their personal spaces.</p> <p>To enhance co-creation practices between artists, students, professors and community members. The idea would be for the two artists to guide a workshop with students having the installation as its main outcome.</p>	12/04/2024 28/12/2023

			<p>To embrace the essence of nature and the symbiotic relationship between urbanity and the natural world, extending beyond the confines of Madrid. Since the following week TAI is hosting a BIP European Project event that focuses on sustainable cities, we would like to involve European project partners' students in the installation process as well. For this BIP project, named Re-imagining Sustainable Cities: An Interdisciplinary Exploration, we are connecting with universities from Italy, Croatia and Portugal. Consequently, we plan to extend invitations to students from these institutions to participate remotely, contributing soundscapes, sketches, audiovisual pieces, or even physical objects if they so desire. In addition, the week before the installation's opening we will organize an online lecture by another artist whose work will inspire the community, serving as a catalyst for the event. By unifying these initiatives we aim to broaden the impact of the installation across diverse audiences.. Having a live installation: We advocate for the live nature of the installation, intending for it to evolve organically through the conversations and brainstorming sessions of the BIP event.</p> <p>In alignment with our sustainability strategy, we will establish an Instagram account. This platform will not only disseminate videos and manuals related to the installation but also actively encourage participants to share their individual experiences.</p>	
Perspectiva: futures are rural ...	Genalguacil	Fundacion Genalguacil Pueblo Museo	<p>Perspectiva: futures are rural... a multi-place film festival in and of the rural</p> <p>Imagine a film festival not only as an event, but as a site of production, research and learning. A festival, dedicated to address the various challenges of rural areas within their respective historical backgrounds through the collective and inviting methodologies of filmmaking and film viewing. To spark innovative ideas in exchange with other peripheral, rural places.</p> <p>A carefully curated selection of films across genres opens up global perspectives on rural issues, including questions of time, material and heritage, artistic and collective entrepreneurship, care, agriculture and food production, and ways to foster circular economies.</p> <p>With an approach to cinema as night-school, the festival will offer a framework for conversations and reflection, learning to see and to create relations between film</p>	14/04/2024 21/04/2024

			<p>narratives and the corresponding environment of the local areas. As part of the learning process, visiting students, filmmakers, artists will actively engage with the place and work with the people through the making of new audio-visual material during and after the period of the festival. Developing questions, insights, skills, potential solutions — a way to understand the value of on-site production and to propel and change perspectives with an audience as makers.</p> <p>Involvement of the local youth in various capacities — as translators and co-ordinators, as co-creators and co-producers of the audio-visual material — will be encouraged. The festival will create opportunities to participate in innovative, open and care-centric ways of cultural production and to get hands-on experience with video production, design and publishing not only as skills but as methodologies for research. Involvement of women as interlocutors and co-creators will be crucial as their perspective on labour and value is essential to the re-framing of concerns around circular economies, and cooperative models of production.</p> <p>The structure and dynamic of the festival itself will change accordingly. The festival-time is not seen as a representative endpoint of an exclusive preparation process, but as a period of intensification as part of a pre- and post production, and as a new starting point. The subsequent process of editing and re-viewing will allow for a time of reflection and preparation for the next festival, not through the pressing logic to increase and surpass, but as a continuation according to the needs, questions and experiences raised through the previous one.</p>	
Creadores de Futuros	Zaragoza	Griots - Munkun	<p>“Creadores de Futuros” is a festival for artists and researchers, thinkers and makers, curious people and individuals concerned with working for a sustainable future. It is an opportunity to weave together images of green futures along local and diverse spaces and activities.</p> <p>We will bring together diverse initiatives and people:</p> <ul style="list-style-type: none"> - to expose and reflect - to explore and connect - to learn and share 	18/04/2024 19/04/2024

			<p>To do this we propose different activities:</p> <ul style="list-style-type: none"> - Talks and workshops - short film and audiovisual projections - art and design exhibitions and performances <p>The main goals of the festival are:</p> <ul style="list-style-type: none"> - to connect local initiatives along the three provinces of the region. We think we can achieve this by designing the events with special attention to networking, documentation and feedback. - to co-create non-linear visions of local futures in the frame of a global Green Deal. Leverage the knowledge of complexity science researchers to set the stage and guide diverse groups to collaborate in this task. - and to spread the word about the New European Bauhaus. This will be achieved mainly through communication before, during and after the festival. 	
Terra Liber 2024: Recursos Para Todos	Dolores, Alicante	Holistic Education International Association	<p>Terra Liber is our association's annual event located at our national headquarters in the La Fábrica: Art Living Events, a sustainable privately-run cultural hub located in Dolores Alicante. The objective of our event is to showcase the innovative projects created by our professional members in each of their respective fields in a festive atmosphere, promoting creative, intergenerational and intercultural exchange, through different artistic activities, talks and workshops. The first edition was held on April 22-23, 2023.</p> <p>In the 2024 edition we want to reflect and address more in depth topics such as sustainability, circular economy, the zero waste movement, and deep ecology, giving these a creative, innovative and holistic approach where we'll also include a personal development perspective and educative group processes and practices. The main objective of Terra Liber 2024 is to inspire and promote values that lead us to create lifestyles that are more harmonious with nature, without giving up the aesthetic experience, in order to raise awareness about the need for a just transition, and offer the community alternatives to reinvent our future into a more sustainable and caring world.</p>	18/04/2024 22/04/2024

			<p>To achieve this objective we will develop the topics of sustainability, through artistic/creative recycling, and deep ecology by:</p> <ul style="list-style-type: none"> -Holding forums, in person and online, using Deep Ecology and holistic education as our framework, to raise awareness about individualism and consumerism and replacing them with more sustainable ideals. -Holding a marketplace to inform the public about the importance of consuming organic products and promote creative forms of self-employment. -Calling on local artists to create visual and sculptural art installations created with recycled materials, -Calling for innovative and ecological fashion designers from all over Spain to hold a fashion show competition to showcase their best ideas. -Conducting practical “Do It Yourself” workshops for all ages, which revolve around the themes of zero waste, circular economy and sustainability. -Hosting live performances by local artists, poets and musicians. <p>Including people from different cultural heritages in all our activities.</p> <p>-Carrying out activities that include the youth’s perspectives and interests.</p>

The Fashion Orchard: a Fashion integration with Education Program	Barcelona	The Future unFolder	<p>To approach the complex challenge of building more sustainable futures, this proposal focuses on the positive impact that integrating a module of fashion education could have in early institutionalization, tackling and integrating diverse problems that reflect directly on lifestyles. It can be delivered at schools, organizations, brands, groups of interest, etc, and take place both on site or virtually depending on the nature of the pursued goal of the implementation.</p> <p>The Fashion Orchard: a Fashion Integration with Education Program was created to be delivered at schools, institutions and organizations with the aim to integrate concepts of fashion, sustainability, responsible consumption, value creation and creativity, to juniors and youth. Considering the change that the fashion system is going through from the environmental and regulatory perspectives, and after identifying that bold collective action is needed for the wellbeing of the planet and human lives, it is also needed to re-think the system as a whole including the educational dimension to align it with the emergent new conception of development. Collective behavior is powerful, leading to more impactful outcomes than isolated individual actions. The sense of belonging is also constructed on the basis of a</p>	20/04/2024 21/04/2024

			<p>collective interaction, and it is important for individual behaviors not to fall into marginalization, but rather value them to build meaningful change as the root of a systemic change.</p> <p>The Fashion Orchard prepares the field to encourage youth to make well informed and aware decisions that connect with their culture and authenticity, providing great support and understanding during the process of critical learning and decision making.</p> <p>The proposal focuses its educational approach on 4 fundamental axes and consists of two curriculum proposals for different age gaps, with three modules each, to be presented at NEB's satellite event in the form of webinar, by introducing, presenting the project and networking with all people who might be interested in participating in the implementation of the project.</p>
