## 1. NEB Community in Germany

Community status	Total
<a href="#">NEB Partners</a>	83
<a href="#">NEB Friends</a>	15
NEB dedicated calls	5
NEB Prizes Winners	3

## 2. NEB National Contact Point

Ministry in charge of NEB: Federal Ministry for Housing, Urban Development and Building

NEB National Contact Point: Federal Ministry for Housing, Urban Development and Building Unit B II 4, Department for Civil engineering, Sustainable building, Construction research

Persons of contact: Stephan Mayer, [ncp-neb@bmwsb.bund.de](mailto:ncp-neb@bmwsb.bund.de)

## 3. High Level Round Table

Advanced thinkers and practitioners in their field bring inspiration and act as community ambassadors for the New European Bauhaus. More information is available [here](#).

Name	Job title
Ms Pia Maier Schriever	Architect and Set Designer
Mr Hans Joachim Schellnhuber	Systems Physicist and Climate Scientist, Founding Director and Director Emeritus of the Potsdam Institute for Climate Impact Research (PIK) and Director general of the International Institute for Applied Systems Analysis

## 4. NEB in Germany

### 4.1 NEB projects funded by the EU

#### Lighthouse Demonstrators

The first six lighthouses will implement the New European Bauhaus principles of sustainability, aesthetics and inclusiveness on the ground in 13 countries. They will transform neighbourhoods in cities, look into rural development and link projects from different countries. Press release: [https://ec.europa.eu/commission/presscorner/detail/en/IP\\_22\\_2780](https://ec.europa.eu/commission/presscorner/detail/en/IP_22_2780)

Name of the project	Description
<b>NEBourhoods</b>	NEBourhoods prepares Munich-Neuperlach (DE) for the future as mapped out by the <a href="#">European Green Deal</a> when it comes to the built environment, circularity, mobility, energy, food, and health. The project will build on the area's strengths – a strong sense of community, vast green areas, large-scale housing, even if in need of renovation – and address its weaknesses – higher than average unemployment and lower than average education levels.
<b>Bauhaus of the Seas Sails</b>	With this project, cities close to water will be offered solutions to achieve climate neutrality. It will result in seven transformational demonstrators in different regions and aquatic ecosystems: in Portugal (estuary), Italy (lagoon and gulf), Sweden/Germany (strait / sea / river), and the Netherlands / Belgium (delta). The project aims at achieving a sustainable and inclusive transition, keeping the aesthetic at the centre and working closely together with the local communities.

## New European Bauhaus Calls

Projects supported by dedicated NEB Calls

Name of the project	Description	Type of NEB Call	Link
TurtleApp	The TurtleApp promotes secondhand clothing in an attractive and convenient way. The modern and user-friendly app consolidates all the possible second-hand options available in one's proximity, prioritising consumer needs instead of pushing them to buy more, while making use of digital technology to match the right products to the right consumers. All of this can be localised, bringing together consumers, city initiatives, shops and digital platforms with relevant items located within 25 kilometres.	EIT Community Ideation Award	
Craft Cities: Dresden and Lörrach	Dresden and Lörrach are supported through Craft Cities Programme	<a href="#">Craft- Creating Actionable Futures</a>	<a href="#">craft-map.pdf (craft-cities.eu)</a>

## 4.2 NEB Prizes

To accelerate the green transition, contribute to the recovery and to ensure a better living together for all, we have to capitalise on the existing wealth of knowledge, experience and capacities as much as to call for new visions, new ideas and new solutions. The Prizes bring together those excellent examples and new ideas that could inspire the New European Bauhaus. The NEB Champions rewards existing completed examples and the NEB Rising Stars rewards concepts or ideas submitted by young talents aged 30 or less.

### Edition 2024 – Finalists

The NEB Prizes 2024 winners will be announced on 12 April, at the New European Bauhaus Prizes 2024 Ceremony in Brussels. The ceremony will be held as part of the New European Bauhaus Festival, taking place from 9-13 April Brussels. A complete list of finalists: <https://prizes.new-european-bauhaus.europa.eu/finalists>.

Result	Strand	Category	Project Title	Town	Link
Finalist	Rising Stars	Reconnecting with nature	Cultivating Companionship	Bersenbrück and wider region of North western Germany	<a href="#">Application</a>
Finalist	Rising Stars	Prioritising the places and people that need it the most	TEUFELSBERG TRANSFORMATION LAB	Teufelsberg	<a href="#">Application</a>
Finalist	Rising Stars	Shaping a circular industrial ecosystem and supporting life cycle thinking	HopFON	Hallertau	<a href="#">Application</a>

### Edition 2023 – Finalists

The New European Bauhaus Prizes 2023 were awarded on 22 June 2023. You can find a complete list of finalists and winners here: <https://2023.prizes.new-european-bauhaus.eu/>

Result	Strand	Category	Project Title	Town	Link
Finalist	NEB Rising Stars	Regaining a sense of belonging	flip it	/	<a href="#">Application</a>

Finalist	NEB Rising Stars	Shaping a circular industrial ecosystem and supporting life-cycle thinking	"I was once." Reduce waste and do good.	Berlin	<a href="#">Application</a>

### Edition 2021 - Winners

The New European Bauhaus prizes 2021 awarded 10 NEB Awards and 10 NEB Rising Stars. You can find the complete list of finalists here: <https://2021.prizes.new-european-bauhaus.eu/>

Strand	Project Title	Description
NEB Awards	<a href="#">RoSana</a>	The common goal of the architects Anna Heringer and Martin Rauch, the clients and craftsmen to build the RoSana guesthouse as healthy as possible for the people and the planet. The buildings purpose is a guesthouse for the Ayurveda retreat center RoSana in Rosenheim, Germany. It's made for people who seek mental and physical stress relieve, who want to become focused on their inner strength, recharge their energy, get grounded.
NEB Rising Stars	<a href="#">Klasse Klima</a>	All art and design universities must address the climate crisis. This is Klasse Klima's mission, a student-led seminar series and education collective based at University of the Arts Berlin. We are building a transnational network with groups from other art schools, connecting them through innovative digital infrastructure and a fluid joint corpus of transformative knowledge and practices: a synergetic push towards a sustainable and inclusive shift in aesthetic education in Europe and beyond!

### 4.3 NEB Lab

The NEB Lab is a co-creation space at the service of the New European Bauhaus community, for the delivery of beautiful, sustainable, and inclusive projects to improve our daily lives. The Lab is where the New European Bauhaus is implemented in concrete and tangible projects. It is about what we can

achieve when we work together in a spirit of openness and trust. It focuses on connecting people, learning from each other and tapping into everyone's experience.

Website: [https://new-european-bauhaus.europa.eu/about/neb-lab\\_en](https://new-european-bauhaus.europa.eu/about/neb-lab_en)

NEB Lab projects with participating entities from Germany:

Name of the project	Participating DE entities	Description	Link
<b>NEB on the Danube</b>	HfG Foundation (NEB-partner) Hochschule Anhalt Dessau European Danube Academy	The NEB on the Danube is a think-and-do-tank acting as an enabler for the green transition in the Danube region through establishing a functional cooperation of public authorities, civil society, and the private, investment and financial sectors. It aims to improve capacities of cities and regions for triggering and implementing investments into more responsible land use practices, including revitalisation of degraded areas, as a basis for a new green and just economy. It will do so by establishing an ecosystem of public actors, civil society and the private, industry, financial and insurance sectors, as well as experts and practitioners to develop up-to date and financially viable solutions for quality future living and by developing new business and financial models for green investment to fund the green and just transformation. The project will develop and test proposed solutions on pilot sites along the Danube River.	<a href="#">Link</a>
<b>European Triennial of Modernism</b>	BHROX bauhaus reuse / zukunftsgeraeusche GbR (NEB-partner) Architects Chamber Berlin (NEB-partner) buschfeld.com – graphic and interface design Berlin Heritage Authority Berlin Art Library – Berlin State Museums / Prussian Heritage Foundation Goethe-Institute (NEB-partner)	The ETOM-NEB-Lab is a co-creation lab on trans-European Modernism to evolve and realise trans-national cooperation, best-practice, research, and capacity building. The Lab builds for a circular ecosystem on a three-year rhythm to bear and sustain plural transdisciplinary collaboration projects and to establish a decentralised and recurring EUROPEAN TRIENNIAL OF MODERNISM (ETOM) festival.	<a href="#">Link</a>

## 5. NEB Festival 2024

Additional information about the activities and speakers is available on the [NEB Festival website](#).

### 5.1 Satellite events

Title	Location	Organisation	Description	Date (start and end)
ProtoPotsdam Launch Event	Potsdam	Bauhaus Earth	<p>The construction sector alone accounts for 40% of CO2 emissions worldwide. Given the centrality of our built environment to daily life for all humans, reducing this impact will require much more than a collection of technical solutions. We need to craft new narratives that engage all members of society: that demonstrate the positive, inspiring, beautiful potential of designing with the planet in mind.</p> <p>This event will celebrate the opening of ProtoPotsdam, a Bauhaus Earth demonstration project and temporary research pavilion in central Potsdam, Germany. This pavilion - built from regenerative materials and set for the next 3-5 years at the corner of Dortustraße and Spornstraße - will serve as a home for testing, learning, and debate. A place to envision new narratives and creative solutions for the transformation of the built environment.</p> <p>The ProtoPotsdam pavilion will host a variety of events, workshops, seminars, events, film screenings, artistic performances, and other forms of exchange: partly organized by Bauhaus Earth, partly organized by other organizations and initiatives from Potsdam and beyond.</p> <p>The first building phase of the pavilion, which started in the year 2022, focused on certain materials - regional wood, compressed earth, water, and re-used building materials - to create a new public space that includes a garden, toilet structure, kitchen/bar, and public terrace. The design principles and narratives of the used materials will be permanently exhibited around the pavilion.</p>	20/04/2024 20/04/2024

			<p>This opening event will showcase and celebrate the research and design of the pavilion while kicking off a three-year public program.</p> <p>Main components of the event include:</p> <ul style="list-style-type: none"> <li>- Screening of a documentary film showing the 1,5 years of design and research process that went into the development of the pavilion</li> <li>- Guided tour of the pavilion</li> <li>- Workshops</li> <li>- Networking with and presentation by city officials</li> <li>- Public lecture discussing the scientific research that went into the pavilion, including the potential to use regional recycled materials, wood and earth in regenerative building</li> <li>- Side events for children that focus on getting to know materials (for instance, pressing bricks made of local compressed earth)</li> <li>- Evening concert and public dinner performance</li> </ul> <p>Keeping in mind that the transformation of the building sector can only work if we all pitch in, the event will address a broad audience: from experts to city officials, from neighbours to construction workers, from seniors to children - and all kinds of inquiring minds.</p>	
Transformative Possible Futures – exhibition opening with panel and workshop	Dresden	Department of Speculative Transformation (TU Dresden)	<p>The exhibition “transformative possible futures” is organized by the newly founded Department of Speculative Transformation at TU Dresden and will take place at the COSMO Science Forum in the Kulturpalast in the middle of the city of Dresden (Saxony) from April to June 2024. The exhibition focuses on the transformative impulses and interconnections between science and society. We will present research exhibits and in particular digital visualizations about the construction and imagination of possible futures with transformative character. And we will evaluate the research behind the exhibits with the help of these exhibits and we will use the exhibits as boundary objects to discuss and develop possible futures together with broad audience especially in settings of participatory workshops. Topics to be exhibited will touch among others future mobility and urban</p>	18/04/2024 19/04/2024

			<p>development as well as the reuse of mining landscapes. The exhibition will incorporate different media forms from film, digital software interfaces to extended reality (VR/AR).</p> <p>The event setting within a potential NEB festival frame is two-fold. The central event for the exhibition is the opening that will take place April 18, 2024. The opening will be a public event and include a transdisciplinary panel and a reception.</p> <p>On April 19 we plan a first participatory workshop of a series of workshops during the exhibition about local transformative possible futures. This first workshop will deal with potential public intervention spaces in Dresden. Central to the workshop is the transformation of affected citizens from users of urban spaces to producers of these taking responsibility for their environment also including spheres beyond human.</p> <p>We hope to further the issue of transformation in Dresden and beyond in a sustainable, community-based and aesthetic sense on a concrete and local level with the people who are affected in combination with connected stakeholders from decision-making levels. With the exhibition and the event described we would like to accelerate the discussion about the transformation in society with the support of science in general and the joint transformation e.g. of urban spaces in Dresden in particular. We hope that the participatory workshop of the event is a starting point of a broader public engagement of citizens in Dresden to (re-)claim, reuse, and redesign space and thus fulfill one of the central NEB ideas of beautiful places as aesthetically pleasing and commonly good.</p>	
Solarized Businesses in Sustainable Buildings	PMF Housing / Würselen / Germany	Don Bosco Mondo e.V. (in partnership with PMF Housing and Don Bosco Solar) Dr. Susanne Franke	<p>Three institutions partner for this event:</p> <ul style="list-style-type: none"> <li>• Don Bosco Mondo e.V.: German NGO supporting Don Bosco institutions internationally with different resources. The NGO focuses education and vocational training, the latter in cooperation with companies. The NGO is partner of the “Green Alliance” of Don Bosco and the NEB and thus strives to promote the values of both initiatives.</li> <li>• PMF Housing: German Startup that developed a modular system for the construction of affordable high-quality buildings. They have a flexible, variable architecture with different sizes, shapes and uses that can</li> </ul>	19/04/2024 19/04/2024

		<p>s.franke@don-bosco-mondo.de</p>	<p>be adapted to different climates, cultural, traditional and individual needs; they withstand strong hazards from storms, rain, flooding and earthquakes. The buildings have a minimum ecological footprint, can be manufactured locally and combine excellent insulation with a long lifetime. The manufacturing does not require any hazardous material and the buildings can be widely re-used or recycled when no longer needed.</p> <ul style="list-style-type: none"> <li>• Don Bosco Solar: Based in Accra / Ghana, the institute has a team of experts to provide both on-grid and off-grid PV installation and training. All trainings are practical based, the teachers place more emphasis on hands-on-practicals and not only teach theoretical knowledge. The institutes cooperates with international experts and reaches out to different African countries.</li> </ul> <p>The partners have a joint cause: The building of sustainable housing for businesses, powered by solar energy. Both building and solarization should be accompanied by vocational training, thus enabling marginalized target groups to implement both processes professionally themselves. The skills can be used</p> <ul style="list-style-type: none"> <li>• in private projects taking care of home and family,</li> <li>• in employment where there are labour markets</li> <li>• or entrepreneurship where the markets fit.</li> </ul> <p>In this special combination the partners relate to the values of NEB as well as to several SDGs.</p> <p>Goal 4: Quality Education Goal 5: Gender Equality Goal 7: Affordable and Clean Energy Goal 8: Decent Work and Economic Growth</p> <p>The pilot shall be a solar powered cool house. The combined expertise is ready to act, we are looking for partners, know how transfer and funding.</p> <p>In the event, we will first introduce each partner with their respective goals and portfolios, and after a Q&amp;A on these shorter sessions come up with the joint case: For emerging and developing countries (represented by Don</p>	
--	--	------------------------------------	---	--

			Bosco Solar / Ghana and Don Bosco Mondo) as well as for German communities. We have the script for the event not yet written, but there will be communication with the participants, especially on their questions and expertise, and the option to “tour” the workshop of PMF Housing.	
Offenes Forum Baukultur (Open Forum for Baukultur)	Berlin	Förderverein Bundesstiftung Baukultur e.V.	The Open Forum Baukultur will take place at the DAZ in Berlin and offers content-related impulses on the topic of the built environment. The themes of Baukultur include social, economic, environmental and climatic as well as functional, aesthetic and high-quality aspects. Furthermore we aim to come together, to network and engage in a lively exchange.	18/04/2024 18/04/2024
2. Symposium Nachhaltige Europäische Bauwende	Bielefeld	Schüco International KG, nbau, Aachen Building Experts	Addressing and involving a large target group who is involved in a sustainable building industry. Presentation of various projects with a high degree of innovation from the different areas involved, followed by discussion and exchange with the aim of learning from successful concepts and adapting them. The aim is to network the important stakeholders with each other for a joint timely and effective transformation towards holistic sustainability in the building sector.	18/04/2024 18/04/2024
Wabi-Sabi - Natural materials as innovative, sustainable materials in the construction industry	Aachen (online event)	Aachen Institut für Bodensysteme an der	<p>Wabi-Sabi is a Japanese aesthetic concept (concept of the perception of beauty). It is the antithesis of the Western pursuit of perfection and materialism. Instead, this form of aesthetics focuses on imperfect objects and natural beauty. Wabi Sabi is therefore "the art of imperfection".</p> <p>In our online event, we want to present a small selection of innovative, sustainable natural materials/building products that can be used in sustainable, aesthetically pleasing construction methods and also invite visitors to take part in an online survey (e.g. mentimeter) to find out which of the materials/building products presented they could imagine using in practice for different applications (e.g. also in terms of recycling, refurbish and reuse) and whether they already have experience in this area, which can then be discussed in a moderated dialogue. Furthermore, the online survey of the participants serves to find out which materials should be shown in a hybrid exhibition organised as a result of the satellite event, first in a museum in Cologne and then as a permanent exhibition at the TFI.</p>	17/04/2024 17/04/2024

			<p>The programme of the event (lasting 1.5 hours) is planned as follows:</p> <ol style="list-style-type: none"> <li>1. welcome and introduction of the speakers (Jacqueline Lemm, Florian Guttenbacher (both TFI) and Sylvia Leyendecker (interior designer, 100% Interior)</li> <li>2. presentation of innovative, sustainable natural materials/building products</li> <li>3. online survey of participants on the potential practical use and wishes for the exhibition selection of the materials presented</li> <li>4. moderated discussion</li> <li>5. conclusion of the event</li> </ol> <p>The purpose of the event on innovative and recyclable materials in the construction industry is to transfer expertise between material development and application in the construction industry. The aim is also the concrete and solution-oriented use of new building products in order to realise sustainable CO2-neutral buildings in the future, both in existing and new buildings. The environmentally friendly construction of the future with the help of innovative materials through technological openness is specifically addressed here.</p> <p>The choice of materials is a selection of the most exciting material developments of recent years, which combine great potential. Examples include materials such as UHPC (ultra-high performance concrete), PCMs (phase change materials/latent heat storage), VIPs (vacuum insulation panels), SMAs (shape memory alloys), electrochromic glass, oleds, etc.</p> <p>The event invites visitors to explore the materials and possibilities of future construction, with the aim of inspiring those interested in architecture on the one hand, but also motivating them to think outside the box and look for new material possibilities and building product solutions on the other.</p>	
--	--	--	---	--

Advancing the New European Bauhaus: Qualitative Living Spaces and Climate Adaptation Now!	Dessau (online event)	German Environment Agency	<p>Increasing resiliency and multifunctionality in cities through nature-based solutions is a pressing issue. On the one side, research institutions are expected to deliver innovative solutions for climate adaptation, housing, sustainable mobility, urban green space development, health promotion. On the other, public administrations are pressed to create change within set regulatory frameworks. This creates for an interesting coming together of the two perspectives, or in other words a symbiosis of research and implementation, for creating resilient communities.</p> <p>The proposed event builds upon the experience of the German Environment Agency gathered during the “Advancing the New European Bauhaus: Sustainable Mobility and Resilient Urban Spaces for a Better Quality of Life (AdNEB)” in-house research project. AdNEB aims to provide a conceptual, methodical and interdisciplinary contribution to the idea of the New European Bauhaus for urban spaces by addressubg dimensions such as green and open spaces, health and well-being, climate change adaptation, environmental justice and active and sustainable mobility. The project specifically examines how we can deal with pertinent challenges in order to adapt urban spaces to improve the quality of life.</p> <p>The event will inspire a broad range of participants to push the envelope in their own research agendas and within their own communities to support urban transformation. The event looks to discuss complex interchanges between the various involved fields of urban transformation, as work on the topic must search to systematize various factors, influences and aims, as well as the conditions and mindsets of municipal administrations, planners, citizens and building developers, to name a few factors. The NEB Initiative is perfectly suited for this, since it brings together such as wide range of professions. By building upon the spirit of the NEB, the invited guests will be able to present their main findings and research to an international target audience to forward the international debate and also showcase solutions on the ground which work.</p>	19/04/2024 19/04/2024
---	-----------------------	---------------------------	--	--------------------------

			In light of this, the proposed side event will focus on the renovation of the existing city sphere for new future-oriented challenges and opportunities. This will be achieved by linking two spheres of activity, namely climate change adaptation and quality of life in urban quarters. The side event will explain how renovation in districts and streetscapes can not only address the ecological dimension e.g. for climate protection etc. but also address the social perspective of inhabitants. The issue of district-based planning for increased resource efficiency, climate adaptation, sustainable mobility and stakeholder participation will be exemplified. The role of urban, green space and transport planners and relevant units of municipal administrations to be “change agents” will be highlighted.
