## 4.2 NEB Prizes

To accelerate the green transition, contribute to the recovery and to ensure a better living together for all, we have to capitalise on the existing wealth of knowledge, experience and capacities as much as to call for new visions, new ideas and new solutions. The Prizes bring together those excellent examples and new ideas that could inspire the New European Bauhaus. The NEB Champions rewards existing completed examples and the NEB Rising Stars rewards concepts or ideas submitted by young talents aged 30 or less.

Result	Strand	Category	Project Title	Town	Link
Runner-up	NEB Rising Stars	Prioritising the places and people that need it the most	CoolCo's - Cooling Corners & Corridors	Budapest	<a href="#">Application</a>

## 4.3 NEB Lab

The NEB Lab is a co-creation space at the service of the New European Bauhaus community, for the delivery of beautiful, sustainable, and inclusive projects to improve our daily lives. The Lab is where the New European Bauhaus is implemented in concrete and tangible projects. It is about what we can achieve when we work together in a spirit of openness and trust. It focuses on connecting people, learning from each other and tapping into everyone's experience.

NEB Lab projects with participating entities from Hungary:

Name of the project	Participating HU entities	Description	Link
<b>NEB on the Danube</b>	Budapest Metropolitan University KÉK - Hungarian Contemporary Architecture Centre Marton Mehes, Cultural Manager, Vienna/Budapest	The NEB on the Danube is a think-and-do-tank acting as an enabler for the green transition in the Danube region through establishing a functional cooperation of public authorities, civil society, and the private, investment and financial sectors. It aims to improve capacities of cities and regions for triggering and implementing investments into more responsible land use practices, including revitalisation of degraded areas, as a basis for a new green and just economy. It will do so by establishing an ecosystem of public actors, civil society and the private, industry, financial and insurance sectors, as well as experts and practitioners to develop up-to date and financially viable solutions for quality future living and by developing new business and financial models for green investment to fund the green and just transformation. The project will develop and test proposed solutions on pilot sites along the Danube River.	<a href="#">Link</a>
<b>European Triennial of Modernism</b>	KÉK - Hungarian Contemporary Architecture Centre Hungarian Museum of Architecture & Monuments Protection Documentation Center Budapest 13th District / Budapest Municipality	The ETOM-NEB-Lab is a co-creation lab on trans-European Modernism to evolve and realise trans-national cooperation, best-practice, research, and capacity building. The Lab builds for a circular ecosystem on a three-year rhythm to bear and sustain plural transdisciplinary collaboration projects and to establish a decentralised and recurring EUROPEAN TRIENNIAL OF MODERNISM (ETOM) festival.	<a href="#">Link</a>

## 5. NEB Festival 2024

### 5.1 Satellite events

Title	Location	Organisation	Description	Date (start and end)
Human- & Nature-Centric Urban Development	Budapest	BURST NONPROFIT Ltd.	<p>Our event aims to bring the NEB principles and values to the attention of the general public, with special focus on municipalities, urban development professionals and engineers; to showcase their practical applicability in sustainable urban development; and to demonstrate how NEB principles offer exceptional environmental &amp; social benefits.</p> <p>The main organizer of the event is BURST Nonprofit Ltd. (the Bright Urban Solutions Team), one of the official partners of the NEB initiative. BURST is also the founding member and coordinator of the Hungarian “NetworkNature” Nature-Based Solutions Hub, called TeAM HUB. BURST’s mission is to stimulate urban transformation by formulating sustainable urban strategies and urban regeneration projects, inherently applying the values of NEB.</p> <p>BURST joined forces with two co-organisers: first, the Hungarian University of Agriculture and Life Sciences (MATE), acting as the National URBACT Point, and hosting the Institutes of Landscape Architecture, Horticulture, Rural Development &amp; Sustainable Economy, Environmental Sciences, etc., all closely linked to sustainable development. They contribute to the event with URBACT good practices (e.g. hands-on tools easy to be applied in relation to NEB principles), state-of-the art knowledge on municipal green-blue infrastructure as key means for reconnecting cities with nature, and mobilize students to engage in discussions. Second, the other co-organiser is the Ministry of Construction &amp; Transport (MCT), who has been working on a new Hungarian law on architecture. Our event provides an excellent opportunity to discuss in-depth among legislators and communities of practice how this new Hungarian law encourages the creation of a sustainable, aesthetic, and inclusive built environment that adheres to NEB values.</p> <p>In summary, key topics to be covered at the plenary session on 17 April are:</p>	17/04/2024 18/04/2024

			<ul style="list-style-type: none"> <li>- NEB in the built environment, and how it is enabled and further promoted by the new Hungarian law on architecture,</li> <li>- NbS projects through the lens of NEB - showcasing sustainable, aesthetic, and inclusive green&amp;blue spaces in cities,</li> <li>- Architectural solutions and urban development approaches aimed at preserving local values and accommodating vulnerable social groups.</li> </ul> <p>The Plenary session around the above 3 themes will be followed by interactive workshops aiming to empower participants to actively engage in sustainable urban development projects and foster hands-on understanding of NEB values via testing the applicability of URBACT participatory methodologies in such frames.</p> <p>On the 2nd day (18 April) an online transnational knowledge exchange session is foreseen, bringing together BURST's fellow NetworkNature NBS Hubs, as well as key NEB community facilitators across Europe, in order to share insights how NEB values are being pursued in sustainable urban development, both at local / regional / national policy level, and at practical level, i.e. via specific projects and good practices.</p>
