4.1 NEB projects funded by the EU

Lighthouse Demonstrators

The first six lighthouses will implement the New European Bauhaus principles of sustainability, aesthetics and inclusiveness on the ground in 13 countries. They will transform neighbourhoods in cities, look into rural development and link projects from different countries. Press release: https://ec.europa.eu/commission/presscorner/detail/en/IP_22_2780

Name of the project	Description
EHHUR (EYES HEARTS HANDS Urban Revolution)	<p>The project supports cities and vulnerable residents in transforming their built environment. Spread across seven different locations in the EU and Associated Countries (DK, EL, BE, PT, TR, HR, IT), it will seek to tackle socio-economic and cultural challenges such as social segregation, energy poverty, and degradation of depopulated historical centres.</p> <p>The Municipality of Kozani participates in the project “EHHUR- EYES HANDS HEART Urban Revolution” as the only pilot city in Greece, which serves as a good example for the transition towards climate neutrality.</p>

3.2 NEB Prizes

To accelerate the green transition, contribute to the recovery and to ensure a better living together for all, we have to capitalise on the existing wealth of knowledge, experience and capacities as much as to call for new visions, new ideas and new solutions. The Prizes bring together those excellent examples and new ideas that could inspire the New European Bauhaus. The NEB Champions rewards existing completed examples and the NEB Rising Stars rewards concepts or ideas submitted by young talents aged 30 or less.

3.3 NEB Lab

The NEB Lab is a co-creation space at the service of the New European Bauhaus community, for the delivery of beautiful, sustainable, and inclusive projects to improve our daily lives. The Lab is where the New European Bauhaus is implemented in concrete and tangible projects. It is about what we can achieve when we work together in a spirit of openness and trust. It focuses on connecting people, learning from each other and tapping into everyone's experience.

NEB Goes South	School of Architecture, National Technical University of Athens	This community-led NEB Lab project connects six south European countries which join forces to reflect about and improve education through architecture. Southern European regions deal with a multitude of similar climate and social problems; furthermore, they also share rich histories and a cultural heritage in need of protection. Acknowledging this common geographical and cultural legacy, the NEB goes South initiative emerged as a direct response to the New European Bauhaus challenge.	Project fiche

ATHENS WATERFRONT - Participatory Design and the NEB	Athens	GIAMAKOS ARCHITECTS & ASSOCIATES ARCHITECTURE + PLANNING SINGLE MEMBER P.C.	<p>The main theme of the event is 'Participatory Design' to inform and activate the community through science, art, play and co-creation in a two-way process that guides design choices in spaces and systems to ensure different than usual design approaches.</p> <p>In this context, our team, under the auspices of the Region of Attica, based on the principles and values of the NEB, designed a participatory design programme for the Athens waterfront "ATHENS WATERFRONT", in order to demonstrate in practice a methodology and practice that can be applied more generally to the transformation of the Shared Public Space.</p> <p>The project aims to involve in the participatory design process more than 6000 students, teachers and citizens in a planned three-stage process before and after the Festival, which is briefly described below and in detail on the project website.</p> <p>On the Athens sea front, the Region of Attica is currently implementing what is perhaps the most important urban planning intervention for the city ever - the unification of its sea front from end to end. The Athenian Riviera. A major project that paves the way for a participatory Waterfront project, through art and inclusion.</p> <p>The focus of the event, as a value proposition of the Sea Front for the whole of Attica, will be the promotion of the Attica Region's project in the</p>	17/04/2024 21/04/2024

			<p>bay of Paleo Faliro, a project already funded by the New European Bauhaus.</p> <p>Globally, it should be noted that the subject of the integration of the Sea Fronts is a complex and difficult issue, as its completion touches on maritime spatial planning and special uses. In Greece, the first similar effort was made by Giamakos Architects in 1996 for the city of Volos, while in 2018 the project proceeded through a postgraduate thesis at the University of Thessaly to a resilience proposal for the city of Volos with a horizon of 2050. Today the same team, building on the experience of a similar participatory design project submitted for the NEB - 3D Art and Crafts awards, for the Athens Metropolitan Park, is implementing the ATHENS WATERFRONT project in the context, principles and values of NEB in Athens, with collective processes by and for the citizens themselves.</p> <p>The groundwork, collection, processing and presentation for 14 focal points for the entire Athens sea front, including the current situation and current studies and visions, in cooperation with regional organizations, active scholars and others, are planned for the days of the event, which starts in practice from January 2024 and culminates in the actual event period.</p>
